

Since 1996, Sage Advisory Services has been offering a comprehensive combination of portfolio management, risk management analytics, asset/liability (LDI) services, and regulatory reporting services for insurance organizations.

As part of our ongoing research and strategy development series, Sage has created the **Asset Liability Compendium 2009** to give a more complete overview of all the various asset liability (LDI) services we provide. Sage's Asset Liability Compendium is available to qualified institutional investors and consultants.
