Client Brochure

Date of Brochure: March 26, 2022

This Brochure provides information about the qualifications and business practices of Sage Advisory Services, Ltd. Co. If you have questions about the contents of this Brochure, please contact us at (512) 327-5530.

The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (SEC) or by any state securities authority.

Additional information about Sage is available on the SEC’s website at www.adviserinfo.sec.gov. The SEC’s web site also provides information about any persons affiliated with, registered, and required to be registered as investment adviser representatives of Sage.

Sage is a registered investment adviser. The registration of an investment adviser does not imply any level of skill or training. The oral and written communications made to you by Sage, including the information contained in this Brochure, should provide you with information to determine whether to hire or retain Sage as your adviser.

Please be aware during your review of our Brochure when we use the words “Sage”, “we” and “our” we are referring to Sage Advisory Services, Ltd. Co. When we use the words “you”, “your” and “client” we are referring to you as our client or our prospective client. We use the term “Associated Person” when referring to our officers, employees, and all individuals providing investment advice on behalf of Sage.
ITEM 2    MATERIAL CHANGES

The following is a summary of material changes made to our Brochure since our last annual update dated March 26, 2021.

Item 4 – Advisory Business

Principal owners were updated to reflect the addition of employees to ownership.

In addition, added a section to the Overview of Services to disclose Sage’s Environmental, Social and Governance (ESG) Integration and Methodology for our fixed income, actively managed ETF strategies, Impact investing and Socially Responsible Investing (SRI) portfolios.

ITEM 4  ADVISORY BUSINESS

SAGE ADVISORY SERVICES, LTD. CO. is a Securities and Exchange Commission (SEC) registered investment adviser located in Austin, Texas. Sage was founded in 1996 and is organized as a Texas Limited Liability Company.

Sage strictly offers registered investment advisory services and is not affiliated with any broker-dealer and does not provide investment banking or broker-dealer services.

Sage specializes in domestic and international fixed income, balanced and equity portfolio management for individual and institutional clients. Sage offers a commonsense approach toward investing by utilizing strong risk-control disciplines and a process that is repeatable.

Sage’s belief is a conscientiously monitored investment management program designed specifically for each client can satisfy clients’ constantly changing investment needs. Sage seeks to add value through its investment management process applied based upon each client’s investment risk constraints.

Sage’s investment management process combines fundamental economic analysis with quantitative security and yield curve valuation techniques to produce a comprehensive core management style.

PRINCIPAL OWNERS

Sage is independently operated and owned entirely by employees. The principal owners are:

- Robert G. Smith III, its President and Chief Investment Officer
- Robert Peck, Managing Member
- Sean Krasan, Managing Member
- Robert Williams, Managing Member
- Thomas Urano, Managing Member
- Jeffrey Timlin, Managing Member
- Gregory Figaro, Managing Member
- Michael Walton, Managing Member; and
- John Slais, Managing Member
- Robert Moser, Managing Member
- Andrew Demand, Managing Member
- Komson Silapachai, Managing Member
- F. Dustin Finley, Managing Member
- Cameron Ladd, Managing Member
- Wade Uloth, Managing Member
- Allison Hartman, Managing Member

EDUCATION AND EXPERIENCE

Sage’s Associated Persons are expected to have education and business backgrounds that enable them to perform their respective responsibilities effectively. In assigning responsibilities, Sage considers academic background (including studies in college and graduate schools, as well as degrees earned), industry training, licenses and certifications.

Work experience in a related field, such as investments, commodities, insurance, banking or accounting, is also considered.

No formal, specific standards have been set, but appropriate education and experience are required. See ADV Form Part 2B for additional information.

ASSETS UNDER MANAGEMENT & ASSETS UNDER ADVISEMENT (AUM/AUA)

As of December 31, 2021, Sage manages $17,544,286,000 in total client assets of which, $15,075,634,000 is managed on a discretionary basis, $2,452,750,000 is managed on a model provision basis, and $15,901,000 is managed on a non-discretionary basis.

OVERVIEW OF ADVISORY SERVICES

Sage offers investment management services to individuals and high net worth individuals as well as institutional clients, including those clients managed through wrap programs, corporate pension and profit-sharing plans, Taft-Hartley plans, insurance companies, charitable institutions, foundations, endowments, municipalities, registered mutual funds, exchange traded funds, unitized funds, collective investment funds, trust programs, and other U.S. and international institutions.

While Sage generally makes investment decisions on behalf of clients, Sage does permit clients to impose restrictions on investing certain securities or other limitations as mutually agreed upon.

Sage also offers advisory services to clients seeking liability directed investment solutions, fiduciary (3(38)) services, and insurance company specific services.

All clients are subject to a written agreement which describes the nature of our services, limitations, objectives, fees and other matters.
INVESTMENT MANAGEMENT

Sage offers a common sense and client objective-driven approach toward investing with strong risk-control disciplines utilizing a repeatable process. Sage distinguishes itself in the following areas:

- **Investment Management** - Sage seeks to manage each client’s portfolio separately and individually to assist them in obtaining their safety, liquidity, income, tax sensitivity, total return and risk expectations.

- **Disciplined Process** - Sage adheres to a process that focuses on each client’s financial objectives within a mutually understood risk tolerance.

- **Client Education** - Sage educates clients on market trends, economic forces and investment fundamentals to foster a better understanding of investment decisions.

- **Investment Reporting** - Sage provides clients with convenient password protected access to their account information anytime, from anywhere via Sage’s website.

Sage offers certain investment management services to employers sponsoring defined contribution retirement plans with participant-directed investments. As the plan’s fiduciary and investment manager, Sage selects and monitors the exchange traded funds that are offered as investment options to participants under the plan’s investment menu.

After the Investment Committee decides on the duration target, the sector allocation and the security characteristics desired, the portfolio managers, operating on a team basis, implement the decisions reached by the Investment Committee.

Each portfolio is managed separately and tailored to assist respective clients in meeting their safety, liquidity and total return expectations.

It is Sage’s belief that only an individually designed and monitored investment management program can satisfy the constantly changing investment needs of each client.

In addition to the Investment Committee, when a client or prospect engages with Sage, they could be interacting with our Portfolio Management team, our Client Service team, or our Institutional and Regional Consultants. Our Institutional and Regional Consultants receive incentive pay that is based on a percentage of revenue derived from the clients that become contracted with Sage.

Please see Item 8 for additional information regarding our investment strategies and please see Item 16 for more information regarding investment discretion and client investment restrictions.

ESG INTEGRATION AND METHODOLOGY

Sage believes environmental, social and governance (ESG) considerations are an important driver of long-term investment returns from both an opportunity and risk mitigation perspective. These considerations are integrated across our core business and built into the principles that guide our investment process on behalf of our clients. Sage believes investing with ESG factors in mind allows us to better and more thoroughly understand the issuers that we are investing in and increases our ability to comprehend risks that may be inherent to an industry or are issuer specific.

**Fixed Income** - For fixed income securities, Sage applies a proprietary framework, the Sage ESG Leaf Score, that provides an assessment of each issue in terms of its preparedness and performance across a range of ESG indicators. Specifically, the process considers the following: financial materiality and ESG risk factors, climate disclosures, relative ranking within an industry
peer group, recent involvement in controversies, and ESG trend analysis. The framework incorporates data and analysis provided by the Sage in-house research team and portfolio management team which is supported by third party information and data sources. The Sage ESG Leaf Score assigns each fixed income issuer an ESG score from 1 to 5 leaves where 1 leaf issuers are considered ESG laggards and 5 leaf issuers are considered ESG leaders. Sage ESG Leaf Scores are generated for all issuers in Sage’s fixed income universe regardless of whether such securities are held in an account which are managed to an ESG strategy. Generally, to be included in Sage’s dedicated ESG strategies an issuer must be assigned a leaf score of 3 or greater. For strategies that are not managed based on ESG factors, Sage ESG Leaf Scores inform investment decisions but are not determining factors.

**Actively Managed Exchange Traded Funds (ETF) -** Sage’s evaluation of ESG is informed by both a stewardship engagement that we conduct with the ETF sponsors as well as ESG data.

First, the stewardship survey, which we conduct annually aims to help us gain a better understanding of how each ETF Sponsor developed and executed its core fiduciary policies and stewardship practices across six core focus areas: voting practices, engagement practices, stewardship professionals, disclosure, climate initiatives, and Diversity, Equity and Inclusion (DEI) policies. Each ETF Sponsor that completes the stewardship survey is assigned a letter grade (A,B,C,D,F) which reflects the relative strength of their respective answers within the peer group for the key focus areas. Each of the focus area grades are then combined to create the cumulative Sage Stewardship Grade for each ETF Sponsor.

Secondly, we leverage data from trusted ESG-data providers, primarily ISS in evaluating the ETF across 3 categories:

- **ISS ESG Fund Rating:** ISS evaluates issuer performance across key ESG criteria. ISS provides grades for each ETF on a 5-star system with the top 10% as 5-Star, 20% as 4-star, and middle 40% as 3-star.
- **Governance Quality:** ISS provides numeric scores for governance risk across four categories: board structure, compensation, shareholder rights, and audit/risk oversight.
- **Carbon and Climate:** ISS provides numeric scores based on ETF alignment with carbon emission budget limits as well as emissions performance across total carbon emissions as well as carbon intensity.

After evaluating data from the stewardship survey as well as ESG performance, governance quality and carbon and climate factors, the ESG research team determines whether the ETF is appropriate for inclusion in the ESG Target Risk ETF models. There is no specific numeric score or grade an ETF is required to have to be included in an ESG Target Risk ETF model, rather the ESG research team comes to a consensus based on an holistic analysis of the stewardship survey results and ISS data.

**Impact Investing -** Our Impact strategies seek primarily to provide positive environmental and social outcomes. The investable universe is designed using a comprehensive framework that considers use of proceeds, third-party verification, and an issuer-level ESG assessment. For taxable fixed income impact investing strategies, our investable universe includes bonds that are labeled green, social, sustainability, or sustainability linked. These labels identify bonds that are devoted to financing new and existing projects or activities with positive environmental or social impacts. For municipal fixed income impact investing strategies, our investable universe includes municipal issuers whose use of proceeds are directed to financing new and existing projects or activities with positive environmental or social impacts. For all impact investing strategies, post issuance reporting is compared to pre-issuance reporting to ensure issuer is following through with stated intention.

**Socially Responsible Investing (SRI) –** SRI investing seeks to avoid investing in businesses perceived to have negative social effects. This type of investing is implemented using an overlay approach to our traditional strategies, which excludes specific social justice issues specified by the client. Sage currently offers the following SRI screens to our clients: Alcohol, Adult Entertainment, Abortion, Gaming, Tobacco and Weapons. The companies included in these screens are identified by the product and services these companies
offer along with company profits derived from such activities.

**INVESTMENT STRATEGIES**

Sage offers the following actively managed investment strategies:

- **Taxable Fixed Income** - Sage’s client’s objectives range from cash management to total return and high total income. Sage also delivers investment strategies in short, intermediate, core duration and ESG profiles. Investment instruments include, but are not limited to, U.S. Government debt, U.S. Corporate debt, U.S. Municipal debt and Securitized Assets, such as mortgage-backed securities and to-be-announced transactions in mortgage-backed securities and other securities (“TBA Transactions”).

- **Municipal Fixed Income** - Sage’s client’s objectives range from cash management to after-tax total return and high after-tax total income. Sage offers investment strategies in short, intermediate, core duration and ESG profiles. Investment instruments include, but are not limited to, U.S. Treasury debt, tax-exempt municipal general obligation debt, and tax-exempt municipal revenue debt.

- **Actively Managed Exchange Traded Funds (ETF)** - Sage’s client’s objectives range from long-term total return to low-volatility income generation. Sage offers strategies in multi asset income, core plus equity, core plus fixed income and balanced accounts. Investment instruments include, but are not limited to, equity, fixed income and alternative ETFs. These strategies include Target Risk, Cash Balance strategies, Income Solutions, ESG Target Risk and certain proprietary accounts.

Please see Item 8 for additional information regarding our investment strategies.

**WRAP ACCOUNTS**

Sage manages wrap accounts using the same investment process described above.

The wrap fee program sponsor pays Sage a portion of the wrap fee they receive for investment management services.

While wrap accounts utilizing the same investment strategy generally perform similarly to the applicable Sage composites, there are expected to be performance differences between them. Actual performance results can differ depending on the size of the account, investment guidelines and/or restrictions, inception date, timing of transactions and other factors. Portfolio Managers, the Systems and Operations Department and Compliance perform regular reviews of performance return dispersion in order to reasonably ensure that certain clients are not favored over other clients.

When managing assets for a wrap platform, Sage will trade away with brokers other than the wrap program sponsor. Trading with other brokers is known as trading away (or engaging in “step out” trades). These trades generally involve fixed income securities and do not include commissions. Please see Item 12 for additional information regarding our Brokerage Practices.

**MODEL PROVISION SERVICES**

Sage offers model provision ETF allocation services to clients whereby Sage provides the client with an updated model as Sage makes changes to the model. The investment and research process for the Sage Tactical ETF strategies follows the same investment strategy as Sage’s Actively Managed ETF strategies described above.

In addition, Sage offers model provision Taxable and Municipal Fixed Income allocation services to clients whereby Sage provides the client analysis on specific fixed income securities to purchase for the portfolio. The investment and research process follows the same investment strategy as the Taxable and Municipal Fixed Income strategies described above.

While model provision accounts that utilize the same investment strategy generally perform similarly to the applicable Sage composites, there are expected to be performance differences between them because Sage does not have trading discretion over these accounts. Actual performance results can differ depending on the size of the account, investment guidelines and/or restrictions, inception date, timing of transactions and other factors.
**SAGE COLLECTIVE INVESTMENT FUNDS (CIF)**

Collective Investment Funds (CIFs) are institutional investment vehicles that are solely available for ERISA retirement plans. Like mutual funds, CIFs allow investors efficient access to an investment strategy, offer daily valuation and are easily traded through the National Securities Clearing Corporation (NSCC). Relative to mutual funds, CIFs offer a transparent institutional fee structure and more flexible record keeper pass-through arrangements.

The CIFs are created and sponsored by Reliance Trust Company, that invests in the strategies of Sage Advisory Services, Ltd. Co. which serves as a co-subadvisor along with kPlans Investment Services to the CIFs.

These CIFs are available for investment by eligible qualified retirement plan trusts only and have been created specifically for employer-sponsored retirement plan investors.

**LIABILITY DIRECTED INVESTMENT SOLUTIONS**

In addition to traditional investment management services, Sage offers a comprehensive and innovative combination of analytic, investing and reporting services which focus on the key concerns in building an effective Liability Directed Investment management strategy.

Specifically, Sage offers two categories of services:

- **Asset/Liability Analysis**, and
- **Liability Driven Investing**.

Sage provides these services independently or conjunctively for its clients. For example, Sage has clients for whom it solely performs Asset/Liability Analysis, clients for whom it solely provides Liability Driven Investing, and finally, clients for whom it performs Asset/Liability Analysis and provides Liability Driven Investing.

**Asset/Liability Analysis** is the first step in Asset/Liability Management and involves assessing a client’s liability structure and existing asset solution given the current applicable regulatory environment by employing the following analyses:

- Term structure assessment
- Dynamic cash flow modeling

- Interest rate & inflation risk sensitivity analysis
- Customized liability benchmark creation
- Gap analysis & risk budget creation
- Deterministic and stochastic modeling of asset returns
- Accounting and statutory projections using actuarial forecasting software (optional)

**Liability Driven Investing** is the second step in Asset/Liability Management and involves developing and implementing a particular investment management solution given the client’s liability structure, funded status and goals. The investment solution will include:

- Liability targeted investments
- Long duration portfolio management
- Excess alpha and low correlation investment strategies
- A broad range of investments such as futures, swaps and other derivative instruments, if warranted

If a client retains Sage to perform Asset/Liability Analysis, Liability Driven Investing or both, Sage provides reporting and administration services as follows:

- Daily online investment valuation and activity reports
- Year-round investment compliance and oversight reports
- Customized periodic performance evaluations
- Monthly liability benchmark updates
- Assessment & negotiation of derivative agreements, if required

**FIDUCIARY (3(38)) SERVICES**

ERISA Plan Fiduciaries can engage Sage as a co-fiduciary to provide one or more of the following services: investment policy statement assistance, selection and monitoring of investment options, creation and monitoring of investment strategies, asset/liability analytics, and comprehensive reporting.
Specifically, Sage offers two categories of services:

- **Fiduciary Services for DC Plans;** and
- **Pension Risk Management for DB Plans.**

**Fiduciary Services**

Sage Fiduciary Services provide plan fiduciaries of DC plans with investment selection support, a flexible suite of Qualified Default Investment Alternative (QDIA) options, and comprehensive reporting. Plan investment solutions are generally implemented with index-based mutual funds, ETFs, or CITs which are low-cost, efficient, and transparent. Additionally, as needed, Sage Fiduciary Services will provide non-fiduciary services, including but not limited to employee enrollment and education.

**Pension Risk Management**

Sage serves as a fiduciary partner to plan fiduciaries of DB plans by providing asset/liability analytics, an appropriate pension investment solution, and supportive monitoring and reporting. Plan investment solutions are implemented entirely with ETFs which are low-cost, efficient, and transparent.

**INSURANCE COMPANY SERVICES**

Sage offers a comprehensive and innovative combination of analytic, investing and reporting services which focus on the key concerns in building an effective management strategy for insurance organizations.

**Insurance Liability Assessment and Analysis**

- Term structure analysis
- Dynamic cash flow modeling
- Interest rate & inflation risk sensitivity analysis
- Customized liability benchmark creation
- Gap analysis & risk budget creation
- Balance sheet and income statement projections
- Tax efficiency analysis

**Insurance Investment Management**

- Liability targeted investments
- Long duration portfolio management
- Excess alpha and low correlation investment strategies
- Tax sensitive portfolio management

**Insurance Reporting and Administration**

- Daily online investment valuation and activity reports
- Year-round investment compliance and oversight reports
- Customized quarterly performance evaluations
- Monthly liability benchmark updates
- Statutory insurance reporting, including Schedule D reporting
- Investment Accounting

**INVESTMENT ADVISORY SERVICES TO REGISTERED INVESTMENT COMPANIES**

Sage acts as a sub-advisor to a registered Fund that is advised by AdvisorShares Investments, LLC. For its sub-advisory services to these Funds, Sage receives an annual sub-advisory fee based on the average daily value of the assets under management in the Fund(s). Sage currently sub-advises the AdvisorShares Sage Core Reserves ETF (HOLD) advised by AdvisorShares Trust. Please see the Fund’s prospectus and Statement of Additional Information for additional information regarding objectives, investments, fees, risks and other additional disclosures.

**INDEX PROVIDER**

Sage developed the Sage ESG Intermediate Credit Index (the “Index”, GUDBESG). The Index measures an investment strategy that aims to maximize exposure to positive Environmental, Social and Governance (ESG) characteristics, while maintaining high liquidity. Created in April 2017, the Index uses a proprietary selection process to identify securities from the Bloomberg Barclays US Intermediate Credit Index with optimal ESG ratings, while closely aligning duration and risk characteristics to the Bloomberg Barclays US Intermediate Credit Index. The Index is owned by Sage but powered by Wilshire, where Wilshire Associates is retained as index consultant and independent calculation agent.

Sage is the index provider and can receive a license fee for providing this Index to other Funds and unrelated third parties.
ITEM 5 FEES AND COMPENSATION

Sage is compensated by receiving a mutually agreed upon percentage of the assets under management or by receiving a fixed fee.

INVESTMENT MANAGEMENT FEE CALCULATION & PAYMENT PROCEDURE

Sage manages accounts for a variety of individual and institutional clients on a discretionary and/or non-discretionary basis, subject to the investment guidelines contained in their respective client agreement.

- The amounts and specific manner in which fees are charged is negotiated and memorialized in each client’s agreement with Sage.
- Sage does not deduct fees from client accounts.
- Sage invoices clients directly.
- Sage generally invoices clients in advance on a quarterly basis and will also invoice in arrears or prorate fees for capital contributions and withdrawals.
- Accounts initiated or terminated during a calendar quarter will be charged a prorated fee.
- On the termination date of an account, any prepaid, unearned fees will be promptly refunded and earned, unpaid fees will be due and payable.
- Sage’s client agreement typically requires 30 days’ notice for termination.

Sage uses account market values to calculate investment performance and client fees, where applicable. Sage uses pricing information provided by Bloomberg Valuation Services ("BVAL") to value client portfolios. In instances where Sage is unable to determine a price for a security or determines a price received from BVAL is not reflective of fair market value, Sage will determine a fair value for that security according to the methodology outlined in Sage’s Portfolio Valuation Policy.

There are inherent conflicts of interest when Sage values client accounts, as higher security prices increase market values, thereby enhancing performance results and increasing fees. In addition, because clients pay different fees based on differing fee schedules or the size of the account, Sage has an incentive to favor those accounts where it earns the highest fees. Sage maintains investment, trade allocation and account valuation (including fair valuation) policies and procedures to address such conflicts of interest. Further, investment performance return dispersion is reviewed regularly by Portfolio Managers, the Systems and Operations Department and Compliance to reasonably ensure certain clients are not favored over other clients.

When providing investment management services to employers sponsoring defined contribution plans with participant-directed investments, Sage will invoice clients directly or as expressly directed by the plan sponsor in the investment management agreement.

INVESTMENT MANAGEMENT FEE SCHEDULES

Sage’s standard fee schedules (including those for its Model Provision ETF and wrap fee account clients) are provided below. However, in some instances, Sage will negotiate from its standard fee schedule, or waive fees, based upon the circumstances. Sage maintains investment, trade allocation and account valuation policies and procedures designed to address potential conflicts of interest related to the fact that clients pay varying fees.

</table>
Sage’s investment management fee for employers sponsoring defined contribution plans with participant-directed investments is negotiable for each particular plan client’s situation and other relevant factors, including but not limited to the size of the plan, number of participants and the plan’s custodial and recordkeeping arrangement.

Clients who select Sage to manage their SMA assets through a wrap fee program will typically do so under a single contract that the client enters into with the sponsor of the wrap fee program (“Sponsor Firm”). Under this kind of arrangement, the client pays an asset-based fee to the Sponsor Firm and, out of that fee, the Sponsor Firm is responsible for paying an investment advisory fee to Sage pursuant to the fee agreed upon in the sub-advisory agreement between Sage and the Sponsor Firm. Sage’s advisory fees are negotiated separately with each Sponsor Firm and will vary from wrap program to wrap program. Further, the fees paid to Sponsor Firms by clients participating in wrap programs will vary and Sage does not have control or influence over the fees charged to clients by Sponsor Firms.

**FEE SCHEDULE FOR FIDUCIARY SERVICES**

Fiduciary Services for DC plans:

- .45 of 1% to $10 Million
- .35 of 1% on next $15 Million
- .25 of 1% on next $25 Million
- Negotiable over $50 Million

Fees for 3(38) fiduciary services are assessed at the plan level and where Sage-managed CITs are components in the plan investment line-up, Sage will charge zero sub-advisor fees for assets placed in the Sage-managed CITs.

Sage, from time to time, selects and works with certain subcontractors to provide Fiduciary Services to DC Plans. In those situations, the subcontractor provides certain related assistance and supporting services to the DC plan on behalf of Sage as an unaffiliated subcontractor to the Sage. As compensation for these services, the subcontractor will receive a portion of the fee payable to the Sage. These fee sharing payments are made from Sage’s assets. As a result, the payments from Sage to a subcontractor do not directly impact any DC plan’s assets or result in the DC plan’s payment of an additional fee.

Pension Risk Management:

- .40 of 1% to $15 Million
- Minimum fee of $20,000

**FEE SCHEDULE FOR ASSET/LIABILITY ANALYSIS & ANALYRICS**

Asset/Liability Study:

- Initial Asset/Liability Study Base Fee: $15,000
- Subsequent Annual Study Fee: $15,000
- Semi-Annual or Quarterly Update Fee: $2,500

(Per each inter-period update other than an initial or annual report)

Fees for Asset/Liability Analysis & Analytics will be increased above the fee schedule amount based on Sage’s determination of the novelty, complexity and/or time required to perform these analyses. Additionally, any requested revisions, including additional assumption testing and/or scenarios, will result in additional fees depending on the nature and extent of the revisions.

Fixed income management assignments of at least $25 million requesting the Asset/Liability Study above will be provided the study as part of the overall investment management fee as outlined in the investment management fee schedule above.

In the event the fixed income assignment is less than $25 million the fees for each of the services will be billed separately as outlined in the Investment Management Fee Schedule and the Fee Schedule for Asset Liability Analysis & Analytics sections above.

In some instances, Sage will negotiate from its standard fee schedule based upon the circumstances. Fees for the Asset Liability services will be billed upon completion and paid to sending the final report.
The minimum fee for Schedule D services for Insurance Companies is:

- 2.5 basis points on the net asset value of the entire investment portfolio subject to an annual minimum fee of $15,000.
- Additional fees are generally charged for additional entities and services, including automated general ledger accounting and backloading data.
- In the event there is more than one investment manager for the portfolio the fee may be higher and is subject to negotiation.
- The fee will be billed quarterly in advance based on the net asset value of the portfolio on the last business day of the preceding quarter.
- If the Schedule D services are terminated (generally upon 7 days’ notice) before the end of a quarter, fees paid in advance will be pro-rated for the period and the excess refunded promptly to the client.

Sage’s investment management fees are exclusive of brokerage commissions, transaction fees, and other related costs and expenses which shall be incurred by the client. Clients will incur certain charges imposed by custodians, brokers, third party investment advisers and other third parties. Please see Item 12 for additional information about Sage’s brokerage practices.

Mutual funds and exchange traded funds also charge internal management fees and other expenses which are disclosed in the fund’s prospectus.

Such charges, fees and commissions are exclusive of Sage’s fee. Sage does not receive any portion of these commissions, fees and expenses.

On occasion, Sage enters into solicitation arrangements with other registered investment advisers and broker-dealers pursuant to which representatives of their firms (“Financial Advisors”) offer our services to the public. Sage pays a referral fee to the Financial Advisor and/or their firm based upon a percentage of our advisory fee. The total advisory fee in these arrangements is limited to no more than 1.00%. However, in these arrangements, Sage shall not receive any additional compensation beyond our standard investment management fee. In connection with these arrangements, Sage will comply with Rule 206(4)-3 under the Advisers Act. The referral fee is paid pursuant to a written agreement, which is retained by both the Financial Advisor and Sage. This information is disclosed to the client prior to or at the time of entering into an investment advisory agreement with Sage.

Sage does not charge any performance-based management fees.

Sage offers investment management services to individuals and high net worth individuals as well as institutional clients, including those clients managed through wrap programs, corporate pension and profit-sharing plans, Taft-Hartley plans, insurance companies, charitable institutions, foundations, endowments, municipalities, registered mutual funds, exchange-traded funds, unitized funds, collective investment funds, trust programs, and other U.S. and international institutions.

Sage generally requires the account minimums listed below; however, account minimums are subject to negotiation.

Sage manages certain proprietary accounts which are traded alongside client accounts which creates an incentive for Sage to favor proprietary accounts over other client accounts. Sage employees are allowed to invest in the Fund(s) for which Sage provides sub advisory services. Sage maintains investment, trade allocation and account valuation (including fair valuation) policies and procedures to address conflicts of interest related to these accounts.

Sources of information Sage uses to analyze investment strategies include, but are not limited to, the following:

- Proprietary in-house research.
- Quantitative analytics & forecasting.
- NRSRO - Nationally Recognized Statistical Rating Organizations.
- Third party research materials & reports.
- Standard & subscribed databases.
- Financial newspapers and magazines
- Annual reports, prospectuses and Securities & Exchange Commission filings.

**INVESTMENT STRATEGY RISKS**

**TAXABLE FIXED INCOME**

**Principal Investment Risks.** Losing a portion or all of an investment is a risk of investing in taxable fixed income securities. The following principal risks could affect the value of a client’s investment:

- **Debt Securities Risk.** Debt securities, such as notes and bonds, are subject to credit risk and interest rate risk. Credit risk is the possibility that an issuer of an instrument will be unable to make interest payments or repay principal when due. Changes in the financial strength of an issuer or changes in the credit rating of a security may affect its value. Interest rate risk is the risk that interest rates may increase, which tends to reduce the resale value of certain debt securities, including U.S. Government obligations.

- **U.S. Government Obligations Risk.** If a government-sponsored entity is unable to meet its obligations, the performance of the strategy that holds securities of the entity will be adversely impacted. U.S. Government obligations are viewed as having minimal or no credit risk but are still subject to interest rate risk.

- **Mortgage and Asset-Backed Securities Risk.** Mortgage and asset-backed securities risk includes market risk, interest rate risk, credit risk, prepayment risk (i.e., homeowners whose mortgages collateralize the securities held by the Funds may be able to prepay principal due on these mortgages), counterparty-risk and risks related to...
collateral posted in transactions such as TBA Transactions, as well as the risk that the structure of certain mortgage-backed securities may make their reaction to interest rates and other factors difficult to predict, making their prices very volatile.

- **Issuer Risk.** The value of a security may decline for a number of reasons, which directly relate to the issuer, such as management performance, financial leverage, and reduced demand for the issuer’s goods and services.

- **Liquidity Risk.** Liquidity risk is the risk that a security may not be sold at the time desired or without adversely affecting the price.

- **High Yield Bond Risk.** While high yield bonds generally pay higher interest rates than other fixed income securities, there is a higher risk of income and principal loss.

### MUNICIPAL FIXED INCOME

**Principal Investment Risks.** Losing a portion or all of an investment is a risk of investing in municipal fixed income securities. The following principal risks could affect the value of a client’s investment:

- **Municipal Securities Risk.** Municipal securities rely on the creditworthiness or revenue production of their issuers or auxiliary credit enhancement features. Municipal securities may be difficult to obtain because of limited supply, which may increase the cost of such securities and effectively reduce a portfolio’s yield. Typically, less information is available about a municipal issuer than is available for other types of securities issuers.

- **Debt Securities Risk.** Debt securities, such as notes and bonds, are subject to credit risk and interest rate risk. Credit risk is the possibility that an issuer of an instrument will be unable to make interest payments or repay principal when due. Changes in the financial strength of an issuer or changes in the credit rating of a security may affect its value. Interest rate risk is the risk that interest rates may increase, which tends to reduce the resale value of certain debt securities, including U.S. Government obligations.

- **Tax Risk.** A strategy that invests in municipal securities may be more adversely impacted by changes in tax rates and policies than other strategies. Because interest income on municipal obligations is normally not subject to regular federal income taxation, the attractiveness of municipal obligations in relation to other investment alternatives is affected by changes in federal income tax rates applicable to, or the continuing tax-exempt status of, such interest income.

### LIABILITY DRIVEN INVESTING, FIDUCIARY SERVICES, AND INSURANCE COMPANY SERVICES

- **Debt Securities Risk.** Debt securities, such as notes and bonds, are subject to credit risk and interest rate risk. Credit risk is the possibility that an issuer of an instrument will be unable to make interest payments or repay principal when due. Changes in the financial strength of an issuer or changes in the credit rating of a security may affect its value. Interest rate risk is the risk that interest rates may increase, which tends to reduce the resale value of certain debt securities, including U.S. Government obligations.

- **Futures Risk.** On occasion, Sage may recommend its Liability Driven Investing clients invest in futures to help lengthen duration. Risks in such transactions include but are not limited to counterparty failures and risks related to collateral or margin. The use of futures can magnify the risk of loss in an unfavorable market. Futures may not always be successful hedges and their prices can be highly volatile. Using futures could lower the client’s total return, and the potential loss can exceed a strategy’s initial investment in such contracts.

- **Liability Risk.** The measurement of liabilities, whether pension fund, insurance, or non-profit, involve certain forward-looking assumptions and actuarial data. Actuarial data are affected by many
factors, such as changes to fund provisions, participant population, and actuarial assumptions, and therefore are subject to change. Liability forecasts, and the current pricing of those forecasts, will be subject to change and should be monitored accordingly.

- **Issuer Risk.** The value of a security may decline for a number of reasons, which directly relate to the issuer, such as management performance, financial leverage, and reduced demand for the issuer’s goods and services.

- **Liquidity Risk.** Liquidity risk is the risk that a security may not be sold at the time desired or without adversely affecting the price.

### EXCHANGE TRADED FUNDS

- **ETF Trading Risk.** This strategy invests in ETFs. ETFs are investment companies that are bought and sold on a national securities exchange. Unlike mutual funds, ETFs do not necessarily trade at the net asset values of their underlying securities, which means an ETF could potentially trade above or below the value of the underlying portfolio. Additionally, because ETFs trade like stocks on exchanges, they are subject to trading and commission costs unlike mutual funds. Also, both mutual funds and ETFs have management fees that are part of their costs, and the strategy will indirectly bear its proportionate share of these costs.

- **Issuer Risk.** The value of a security may decline for a number of reasons, which directly relate to the issuer, such as management performance, financial leverage, and reduced demand for the issuer’s goods and services.

- **Liquidity Risk.** Liquidity risk is the risk that a security may not be sold at the time desired or without adversely affecting the price.

### ESG INVESTMENT STRATEGY RISK

ESG Investment Strategy Risk. The ESG investment strategy limits the types and number of investment opportunities available and, as a result, may underperform other funds that do not have an ESG focus. The ESG investment strategy may result in the strategy investing in securities or industry sectors that underperform the market as a whole or underperform other funds screened for ESG standards. In addition, the Index Provider may be unsuccessful in creating an index composed of companies that exhibit positive ESG characteristics. Lastly, given the increased market demand for ESG-related and/or ESG driven investment portfolios, publicly traded companies have an incentive to "greenwash" their practices (i.e. to describe neutral or unsustainable practices as "green") in order to be considered for ESG strategies which could result in Sage selecting securities and/or creating an ESG portfolio that does not meet its stated ESG criteria.

### OTHER INFORMATION

In addition to the strategy specific risks identified above, client accounts are subject to general market risk and investing in securities involves risk of loss that clients should be prepared to bear. Securities purchased and held in client accounts may decline in value because of a general decline in the market. Securities markets move in cycles, with periods of rising prices followed by periods of falling prices. The value of the securities held in client accounts will tend to increase or decrease in response to these movements. Sage does not offer any products or services that guarantee rates of return on investments for any time period to any client. All clients assume the risk that investment returns may be negative or below the rates of return of other investment advisers, market indices or investment products.

### ITEM 9 DISCIPLINARY INFORMATION

Registered investment advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to the evaluation of Sage or the integrity of Sage. Sage has never had disciplinary information disclosures applicable to this item.

### ITEM 10 OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

Sage provides investment management services to registered investment companies on an advisory or sub-advised basis. Sage also sub-advises certain CIFs that are intended to serve as investment options for defined contribution plans with participant-directed
investments. Sage is not registered as a Commodities Trading Adviser, in reliance on an exemption from registration with the CFTC under the Commodity Exchange Act.

ITEM 11  CODE OF ETHICS

Sage has adopted a Code of Ethics and Personal Trading Policy (the “Code”) in compliance with Rule 204A-1. The Code expresses the policy and procedures of Sage and is intended to ensure that no Associated Person is taking advantage of his or her position, or even giving the appearance of placing his or her own interests above those of Sage’s clients. Sage’s personnel must act as fiduciaries, and as such must place the interests of clients before their own.

Sage’s Code includes:

- standards of business conduct, including limitations on giving and receiving gifts and business entertainment, making political contributions, serving as a director or trustee for an outside organization and engaging in outside business activities;
- compliance with federal securities laws;
- personal securities reporting;
- pre-clearance of certain transactions;
- prohibitions from using nonpublic information to trade in personal or client accounts;
- reporting of code violations; and
- review and enforcement.

All Associated Persons receive and acknowledge the Code and Sage’s Compliance Policy Manual. In addition, all Associated Persons are required to certify compliance with the Compliance Policy Manual, including the Code, on an annual basis.

PERSONAL TRADING POLICY

Sage has adopted a personal trading policy outlined within its Code.

Sage’s policy is based on the principle that it owes a fiduciary duty to clients to conduct personal securities transactions in a manner that does not interfere with client transactions or otherwise take unfair advantage of their relationship with clients.

Sage requires Associated Persons to pre-clear certain personal securities transactions. In addition, the Code requires Associated Persons to report certain security holdings initially upon being hired and annually thereafter. Finally, Associated Persons are required to report personal securities transactions to the Chief Compliance Officer on a quarterly basis.

Sage has certain proprietary accounts which fall under the definition of beneficial ownership due to certain Associated Persons’ ownership stake in the firm. As provided for in Sage’s portfolio management and trading policies, these accounts will participate in trade orders along with client accounts. This creates an incentive for Sage to put the interests of the firm ahead of clients; however, the Code requires Sage to put clients’ interests first and to report personal transactions and holdings to the Chief Compliance Officer in accordance with the reporting requirements described above. These accounts are exempt from the pre-clearance requirements and personal trading restrictions described above provided the transactions are done in accordance with Sage’s portfolio management and trading policies and procedures.

COMPLIANCE WITH THE CODE OF ETHICS

Sage’s Chief Compliance Officer is primarily responsible for implementing and administering the Code. Associated Persons are required to report any violations of the Code or applicable laws. Failure to comply with the Code can result in disciplinary action, up to and including termination.

Upon request, Sage will provide a complete copy of our Code at no charge.

ITEM 12  BROKERAGE PRACTICES

OVERSIGHT

Sage’s Brokerage Oversight Committee provides oversight of trading and brokerage policies and practices. In addition, Sage maintains investment, trading and brokerage policies and procedures. The following is an overview of trading and brokerage practices, policies and procedures.
SOFT DOLLAR ARRANGEMENTS OR OTHER BENEFITS

Sage does not have any formal or informal soft dollar arrangements with brokers. On occasion, Sage receives unsolicited research from outside sources. This information is not used in the investment decision-making process.

SELECTION OF BROKERS

Sage utilizes traditional brokers, electronic communication networks and trading systems to execute trades on clients’ behalf. Sage has established a Brokerage Oversight Committee to monitor and evaluate the quality of execution received from broker-dealers executing transactions on behalf of Sage’s clients and to oversee trading practices and procedures. Sage’s overriding objective in effecting portfolio transactions is to seek best execution. While the best price, giving effect to brokerage commission, if any, and other costs, is an important factor in this decision, a number of other factors will also enter into the decision. These include:

- Ability to locate liquidity;
- Inventory of fixed income securities;
- New issue supply or underwriting;
- Knowledge of and dominance in specific markets, securities and industries;
- Participation in bid/want lists;
- Quality of execution;
- Financial condition of the firm;
- Acceptable record keeping, administrative and settlement functions; and
- Reputation and integrity.

Recognizing the importance of these factors, Sage may pay commissions in excess of that which another broker or dealer might have charged for effecting the same transaction.

When managing assets for a wrap platform, Sage will trade away with brokers other than the wrap program sponsor. Trading with other brokers is known as trading away (or engaging in “step out” trades). These trades generally involve fixed income securities and do not include commissions.

Lastly, Sage traders occasionally receive entertainment, opportunities to participate in conferences or other organized events arranged by brokers. These events provide our traders with the opportunity to discuss a broad variety of educational topics specific to securities they trade. These activities pose a conflict where Sage’s traders could favor particular brokers that sponsor said activities. However, these activities are not included as criteria in Sage’s Broker Selection process.

BROKERAGE FOR CLIENT REFERRALS

Sage does not consider a broker-dealer’s promotion or sale of registered investment companies sub-advised by Sage when determining whether to select such broker-dealer to execute transactions for clients.

CLIENT DIRECTED BROKERAGE

In very limited circumstances, clients require Sage to direct transactions in their accounts to a particular broker-dealer (“directed brokers”). For clients utilizing a directed broker, the client may forgo any benefit from savings on execution costs that Sage may obtain for other clients, such as negotiating volume discounts on blocked orders. In addition, the client may not receive the same price or commission paid by other clients who utilize different brokers selected by Sage.

TRADE AGGREGATION AND ALLOCATION

TAXABLE FIXED INCOME

It is Sage’s policy to trade taxable fixed income securities for client accounts based on each client’s investment strategy. When practical, Sage separate client account trades will be bunched in a single order (a “block”) in an effort to obtain best execution. Sage seeks to block account trades and avoid partial fill situations. If a block order is filled (full or partial fill) at several prices through multiple trades on the same day, an average price will be calculated for all trades executed by the broker for the block, and all participants in the block trade will receive the average price. Only trades executed within the block on the single day are combined for purposes of calculating the average price. While generally infrequent, partial fills are allocated to give priority to those accounts that require alignment with its investment strategy. On occasion, in order to avoid odd lots Sage will identify a comparable bond that will be allocated to client accounts in which case the original allocation will be revised for the original bond.
MUNICIPAL FIXED INCOME

It is Sage’s policy to trade tax-exempt fixed income for client accounts based on each client’s investment strategy. When practical, Sage seeks to block account trades and avoid partial fill situations. If a block order is filled (full or partial fill) at several prices through multiple trades on the same day, an average price will be calculated for all trades executed by the broker for the block, and all participants in the block trade will receive the average price. Only trades executed within the block on the single day are combined for purposes of calculating the average price. While generally infrequent, partial fills are allocated to accounts within the strategy on a pro rata basis, subject to rounding and reasonable efforts to minimize trading costs.

DEVIATIONS FROM POLICY

Sage’s policy allows for acceptable deviations from the practices described above.

CROSS TRADES

Sage will enter into cross transactions between client accounts when, in Sage’s judgment, it is in the best interest of each client participating in the transaction. Sage uses MarketAxess, an electronic trading network, to execute cross transactions on behalf of clients. Sage believes the MarketAxess solution helps ensure cross transaction are executed in a competitive environment without giving preferential treatment to either the buyer or the seller of the security. Sage will place the security on the trading network, with a bid price provided by Bloomberg Valuation Services (“BVAL”) and adjusted as necessary to provide the most competitive price for the security in current market environment. If the price provided by Sage wins the bid, the cross transaction will be executed. If another broker-dealer wins the bid, the trade will be executed to the winning broker and no cross transaction will take place. Sage will not receive any fee or other compensation, other than their advisory fees, for effecting a cross transaction.

Sage will typically engage in cross transactions when one client needs to sell a bond as a result of an account liquidation, client instruction to raise cash, or portfolio rebalancing and another client is in need of a similar position. The accounts needing the bonds are typically new accounts that are not fully invested, accounts with high cash balances, and accounts that need to be brought in line with composite characteristics. When executing cross transactions, the firm strives to achieve best execution and considers the following factors when selecting a broker-dealer with which to cross trade:

- Ability to provide liquidity;

ACTIVE MANAGED ETF

It is Sage’s policy to make investment recommendations for actively managed ETF accounts, including Sage’s proprietary accounts, together. Once a decision has been made to update the ETF investment allocation model(s), Sage rotates the order in which clients are notified of changes to the model including Sage’s trading desk which then executes trades on behalf of clients. Sage does not exercise trading discretion over its model provision accounts. Sage utilizes a rotation process to place trades on behalf of client accounts and notify its model provision participating platforms of model changes so that no group of clients is consistently favored or disfavored over any other clients.

Certain actively managed ETF clients direct Sage to use a specific broker-dealer to execute trades. Sage will generally place these trades simultaneously with other client trades. Please see the Client Directed Brokerage Section for additional information.

If a block order is filled (full or partial fill) at several prices through multiple trades on the same day, an average price will be calculated for all trades executed by the broker for the block, and all participants in the block...
• Knowledge of and dominance in specific markets, securities and industries;
• Price;
• Quality of execution;
• Acceptable record keeping, administrative and settlement functions;
• Execution of cross trades; and
• Reputation and integrity; and
• Financial condition of the firm.

Sage will not engage in cross transactions with its ERISA accounts, IRAs, proprietary accounts or Funds advised or sub-advised by the firm.

All cross transactions will be done in accordance with our Cross Transactions Policy. In addition, the Brokerage Oversight Committee is responsible for oversight of cross transactions.

TRADE ERRORS

It is Sage’s policy for clients to be made whole following a trade error. When Sage causes a trade error to occur in a client account that results in a loss, Sage will reimburse the client. If the trade error results in a gain, the client will keep that gain. In situations where a trade error occurs due to a third party’s error, Sage will work with the third party to reasonably ensure the client is not negatively impacted by the error.

ITEM 13 REVIEW OF ACCOUNTS

ACCOUNT REVIEW

Sage regularly monitors and reviews client accounts with the objective of ensuring Sage operates in accordance with: clients’ investment policy statements, investment objectives and investment restrictions; written disclosures; management objectives; and Sage’s fiduciary obligation to act in the best interests of its clients. Reviews are consistently performed by the investment personnel assigned to the account and all accounts are reviewed on a regular basis. Clients are generally provided with monthly reports, while certain clients receive additional reporting based on the nature of the services received.

REPORTS

Our practice is to provide monthly portfolio evaluations, quarterly performance reviews and pertinent investment commentaries. Sage provides clients with convenient password protected access to their account information anytime, from anywhere via Sage’s website. Since Sage does not perform any custodial services, reports concerning such services will be forwarded directly to the client by the custodian.

ITEM 14 CLIENT REFERRALS AND OTHER COMPENSATION

CLIENT REFERRALS

On occasion, Sage has entered into written solicitation agreements with third parties who refer potential clients to Sage. Such agreements will be disclosed to potential clients in accordance with Rule 206(4)-3 of the Investment Advisers Act of 1940.

In addition, Sage enters into marketing arrangements with other registered investment advisers and broker-dealers pursuant to which representatives of their firms, financial advisors, offer our services to the public. The Financial Advisor will consult with the client to assess their financial situation and identify their investment objectives and will make a determination that Sage’s services are suitable for the client before recommending Sage. The Financial Advisor will then contact the client at least annually regarding the suitability of Sage’s services for their account. Through these arrangements, Sage pays a cash referral fee to the Financial Advisor’s firm based upon a percentage of Sage’s advisory fee. In connection with these arrangements, Sage will comply with Rule 206(4)-3 under the Advisers Act. The referral fee is paid pursuant to a written agreement, which is retained by both the Financial Advisor’s firm and Sage. This information is disclosed to the client prior to or at the time of entering into an investment advisory agreement with Sage.

The written agreement between Sage and any such solicitor requires, among other things, that the solicitor, at the time of rendering any solicitation activities for which compensation is to be paid, must provide the client with a current copy of Part 2Aof Sage’s Form ADV.

In addition, a separate written disclosure document containing:

• the name of the solicitor
• Sage’s name
• the nature of the relationship between the solicitor and Sage
• a statement that the solicitor shall be compensated by Sage for his solicitation services
• the terms of such compensation arrangement and
• the amount, if any, the client will be charged for the cost of obtaining his account, in addition to the advisory fee, and the differential, if any, between the level of investment advisory fees the client shall be charged by Sage because of the existence of the arrangement between the solicitor and Sage and the amount the client would be charged if there were no such agreement

OTHER THIRD PARTIES

OUTSIDE CONSULTANTS

Many of our clients and prospective clients retain investment consultants to advise them on the selection and review of investment managers. We provide information concerning our investment strategies to consultants who use that information in connection with the searches they conduct for their clients. On occasion we respond to a request for proposal in connection with those searches. In addition, consultants request information from us or provide direction to us concerning the accounts we manage for our mutual clients.

We do not compensate any consultant for making such introductions but in some cases, we do pay for the opportunity to participate, along with other investment managers, in conferences or other organized events arranged by consultants. These events provide us with the opportunity to discuss a broad variety of business topics with consultants, clients and prospective clients. In addition, we do invite consultants to events or other entertainment hosted by our firm.

REGISTERED INVESTMENT COMPANIES

Sage uses various registered investment companies to implement our actively managed exchange traded strategies. From time to time, Sage will receive compensation from some registered investment companies to supplemental marketing efforts. This creates a conflict for Sage where we could use said registered investment companies’ products within our strategies. Sage does not consider this practice when choosing investment options within our strategies.

ITEM 15  CUSTODY

Sage has limited custody for the sole purpose of deducting advisory fees directly from some of our client accounts. Sage does not maintain custody of client assets. Sage’s clients should receive quarterly statements from their broker dealer, bank or other qualified custodian that holds and maintains their investment assets.

Sage urges clients to carefully review their statements and compare the qualified custodian statement to the account statements that Sage provides.

Our statements can vary from custodial statements based on accounting procedures, trade reporting dates, or valuation methodologies of certain securities.

ITEM 16  INVESTMENT DISCRETION

Sage generally provides portfolio management services on a discretionary basis; however, some accounts are managed on a non-discretionary basis. All accounts are subject to a written investment advisory agreement which describes discretionary authority, any investment limitations, investment objectives, fees and other matters.

ITEM 17  VOTING CLIENT SECURITIES

A client’s investment advisory agreement with Sage governs the responsibility for voting proxies within client accounts. As Sage is primarily a fixed income investment manager it is very rare for Sage to receive a proxy in which to vote. In limited situations, Sage will receive a proxy to vote as a result of a client holding fixed income corporate obligations and ETFs. When providing investment management services to employers sponsoring defined contribution plans with participant-directed investments,

Sage will be responsible for voting any proxies relating to the exchange traded funds that are offered as investment options to participants under the plan, unless the plan sponsor reserves such responsibility to
itself in accordance with ERISA and as provided under the investment management agreement.

When voting a particular proxy proposal, Sage takes into consideration, among other items:

- Management’s assertions regarding the proxy proposal;
- Sage’s determination of how the proxy proposal will impact its clients; and
- Sage’s determination of whether the proxy proposal will create dilution for shareholders.

Sage will generally support management’s recommendations on proxy issues related to business operations matters. Sage believes a company’s management should generally have the latitude to make decisions related to the company’s business operations. However, when Sage believes the company’s management is acting in an inconsistent manner with its clients’ best interests Sage will vote against management’s recommendations. Sage will generally vote against non-salary compensation plans (such as stock compensation plans, employee stock purchase plans and long-term incentive plans) unless, in Sage’s opinion, such plans are structured to not create serious dilution to shareholders and Sage will analyze all other compensation plans on a case-by-case basis. Sage will review proxy proposals regarding control matters (e.g., mergers and anti-takeover tactics) related to a company on a case-by-case basis. Sage generally opposes measures limiting the rights of shareholders. Sage generally opposes measures preventing shareholders from accepting an offer of a sale of a company.

In evaluating a proxy proposal, Sage could encounter a material conflict of interest. Sage has a duty to recognize and resolve a conflict before voting the proxy. Sage’s proxy voting policies and procedures describe the actions taken when a conflict is identified.

A copy of Sage’s proxy voting policies and procedures as well as a copy of our voting record is available upon request.

Registered investment advisers are required in this Item to provide certain financial information or disclosures about Sage’s financial condition.

Sage has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients and has not been the subject of a bankruptcy proceeding.

Sage does not file legal proceedings, including class actions, on behalf of clients.

[End of Brochure]
