SAGE | INVEST WITH WISDOM™

Key 2025 Drivers: Consumer Wealth and Confidence

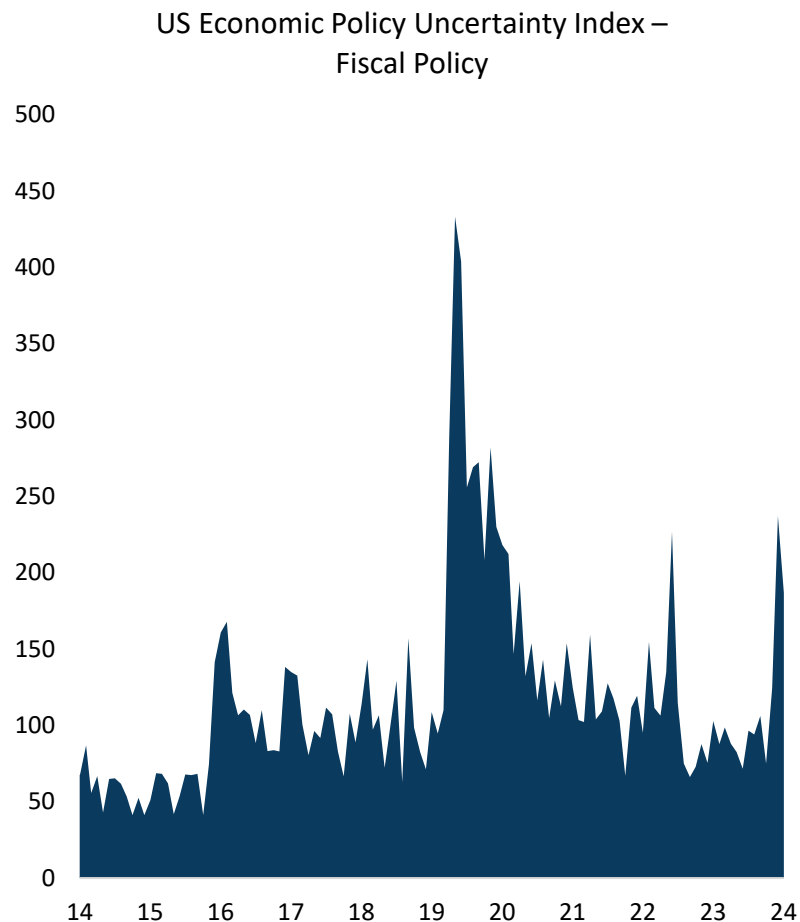

Key 2025 Drivers: Liquidity and Excess Capital Conditions Still Favorable

Key 2025 Drivers: Less Restrictive Global Monetary Policy

Key 2025 Drivers: Fiscal Spending May Slow

Base Case Outlook: Upside With Uncertainty

Asset/Market	Base Case View	Investment Implications
Equities	Macro conditions support further momentum in the first half	Policy uncertainty, profit taking, and stretched valuations suggest lower returns than in 2024 and higher volatility
Rates	Rates will be contained by further Fed easing, weaker growth, and a slow grind down in inflation	Yield carry will drive returns, but duration will be a hedge against macro uncertainty
Spreads	Rangebound spread outlook given demand for yield and strong fundamentals	Valuations make it difficult to add value beyond yield; security selection and wider opportunity set will be key to excess returns
Curve	Modest steepening as Fed continues to cut	Fed pricing suggests yields are fully priced; extending out of cash to coupon bonds makes sense as curves steepen

Surprises or Dynamics that Could Alter Outlooks in 2025

Risk/Headwind	Possible Impacts
Deeper Labor Market Weakness	Recession fears
Inflation Pressure	Pressure on rates and equities
Tariff/Immigration Fallout	Inflationary pressure
EPS Disappointment	Lower equity outlooks, valuations
Deficit/Spending	Pressure on rates/Slower growth if less spending
Alternative Energy/Shift to Nuclear	Lower traditional energy prices

Rate Outlook: Fair Value is a Moving Target

Rate Outlook: Building Blocks

Rate Outlook: Priced for Limited Economic Downside

Credit/Spread Outlook: Riding the Range

Things to Look Out For: Volatility Events or Deteriorating Fundamentals

Fixed Income Outlook: A Nice Base

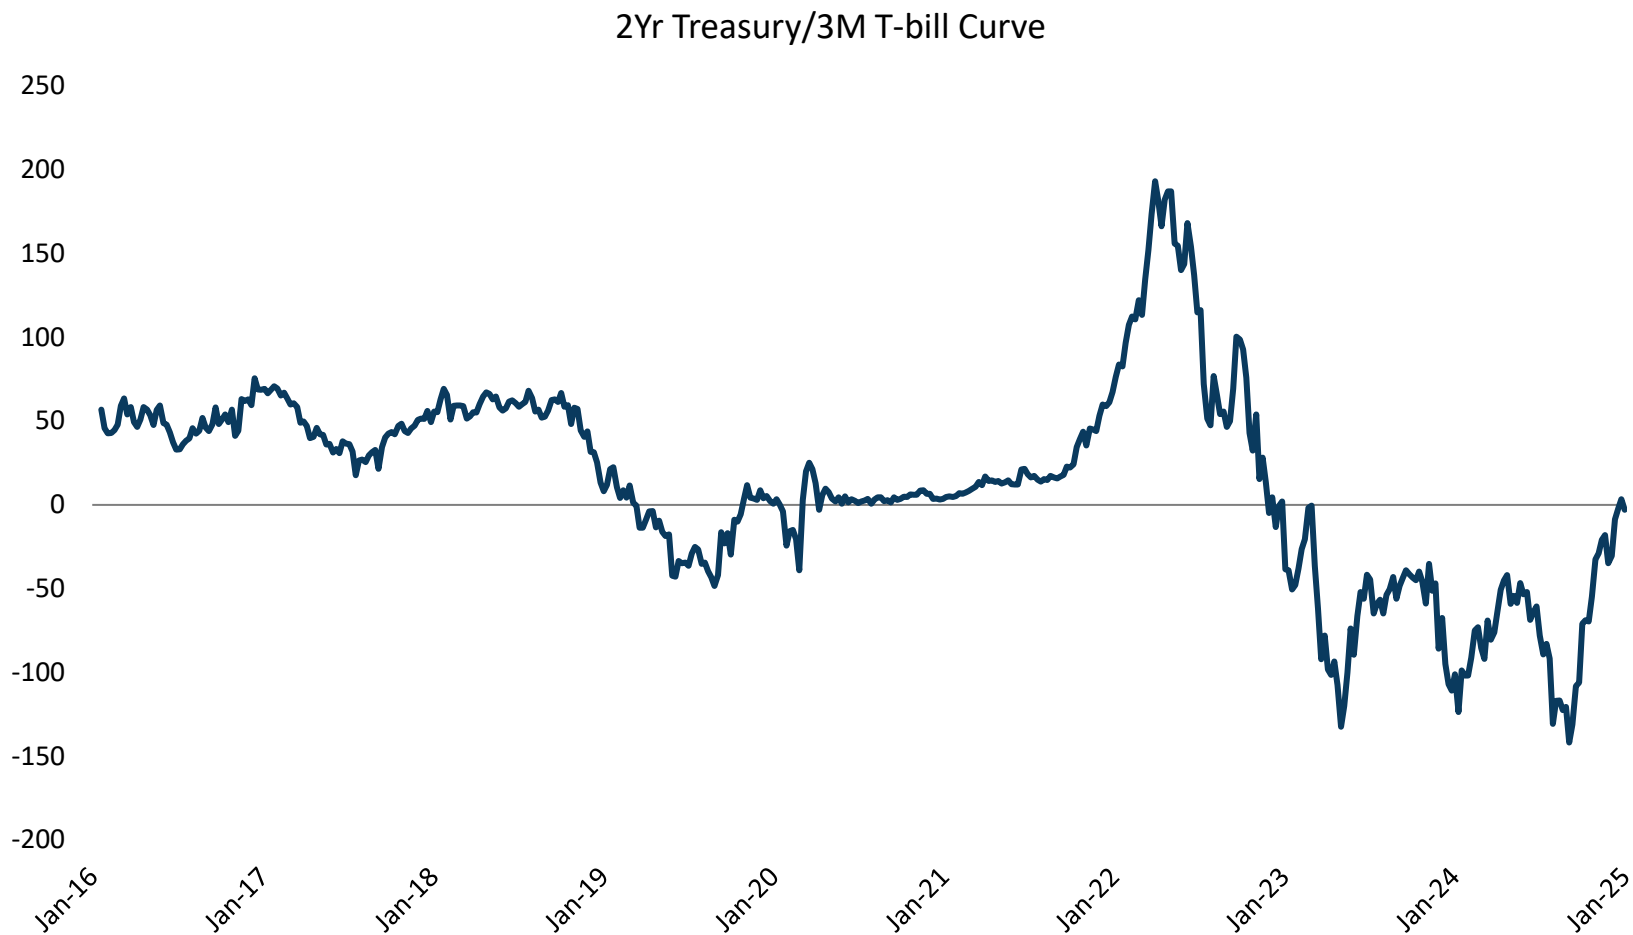

Asset Allocation Outlook: Relative Value Suggests Rebalancing

Asset Allocation Outlook: High Equity Allocations Also Suggest Rebalancing

Asset Allocation Outlook: Cash is Less Attractive vs. Coupon Bonds

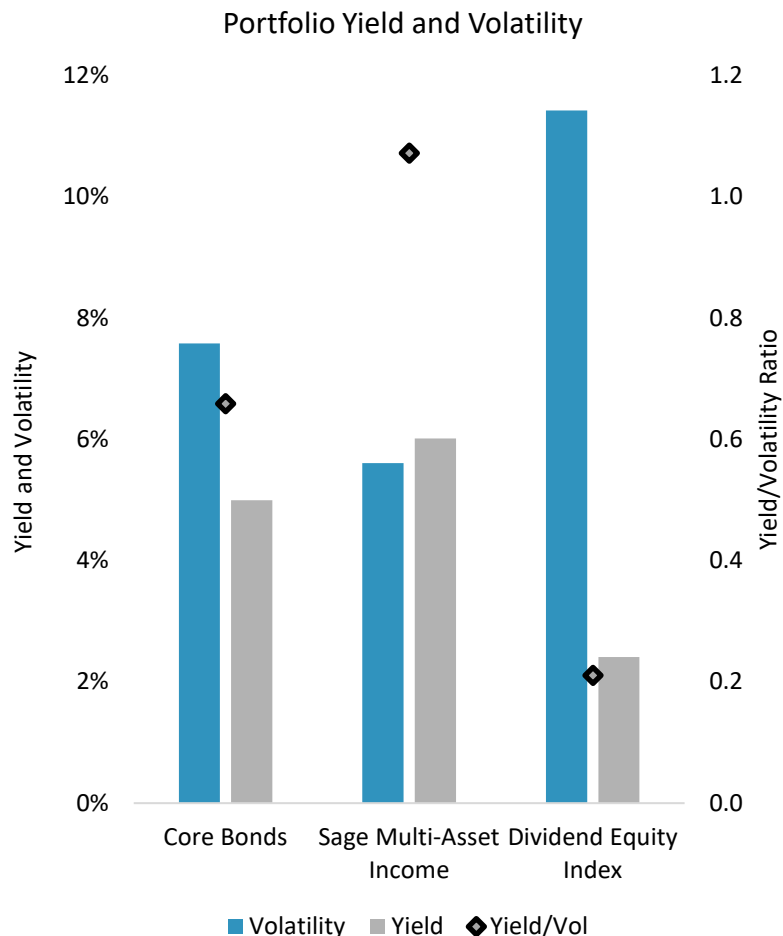

Asset Allocation Outlook: Municipals Offer Attractive Risk/Reward

Municipal Yields and Volatility vs. Core Fixed Income Markets

Asset Allocation Outlook: Multi-Asset Income Also Has Favorable Risk/Reward

Source: Bloomberg, Sage. As of 12/31/2024. Yield and volatility stats are based on Bloomberg Aggregate, S&P Dividend Index and Sage Multi-Asset Income composite.

Equity Outlook: Priced for Perfection

Investors should make their own decisions on investment strategies based on their specific investment objectives and financial circumstances. All investments contain risk and may lose value. Debt or fixed income securities are subject to market risk, credit risk, interest rate risk, call risk, tax risk, political and economic risk, derivatives risk, income risk, and other investment company risk. As interest rates rise, bond prices fall. Credit risk refers to an issuer's ability to make interest payments when due. Below investment grade or high yield debt securities are subject to liquidity risk and heightened credit risk. Foreign investments involve additional risks as noted above. Investing involves substantial risk and high volatility, including possible loss of principal. Bonds and bond funds will decrease in value as interest rates rise. Our Tactical ETF strategy invests in exchange traded funds (ETFs). Investors should consider funds' investment objectives, risks, charges, and expenses carefully before investing. The investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. ETFs trade like stocks and may trade for less than their net asset value. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will either be suitable or profitable for a client's investment portfolio. Past performance is not a guarantee of future results.

Sage Advisory Services, Ltd. Co. is a registered investment adviser that provides investment management services for a variety of institutions and high net worth individuals.
